Read below for more weather details and travel. Time at Temperature Pico Island average temperature at Pico Island varies little. When considering moisture, temperatures feel extremely comfortable all year and a chance for rain or snow in most of the year. The area is much more temperate than most – at the 73rd rate for beautiful weather – compared to tourist destinations worldwide. Weeks and ideal weather are listed above. If you are looking for the very warmer weather to visit Pico Island, the warmer months are August, July, and then September. See the average monthly temperature below. The warmer weather of the year generally mid-August where highs are regularly around 79.1°F (26.2°C) and temperatures rarely dropped below 68.9°F (20.5°C) at night. Temperatures Feel Like Weather The Way We Experience Weather Isn't All About Temperature. The higher temperatures affect us most of higher humidity, and cold temperatures feel pierced with high winds. Temperatures we perceive factors in moisture and cold air at best represent how warm or cold the day feels in a person. Average temperatures of Pico Island by month high (the average for usually gives the best indication of the temperature. A significantly lower mean and low generally just means it gets cold at night. Rainfall (Rain or Snow) If dry weather is what you're after, the months with the lowest likelihood of important rainfall at Pico Island in August, July, and then May. Note that we define important rainfall as 1 inch or more in this section. The lowest odds of rain or snow occur around late May. For example, in the week of May 21st no day of the average rainfall. By contrast, it is most likely to rain or snow at the end of December with an average of 4 days of significant rainfall the week through December 24th. When can you find snow at Pico Island? Temperature stations have no annual snow. Please note that a value of 0 to snow in the graph below can either mean there was no snow, or this snow was no snowing. The graph below shows the chance of rain and snow days at Pico Island. The key graph below shows the average snow on the ground at Pico Island (ACA). Clear average rain and snow by Humidity Month and Van Pico Island have some very humid months, with high humidity throughout the year. The least humid month is November (70.9% relative humidity), and the most humidity month is June (77.1%). Winds in Pico Island are usually moderate. The storm month is December, followed by January and February. Wind speeds average December at around 11.6pc nose (13.4MPH or 21.6KPH) regarded as a moderate brise. Maximum sustained winds (the highest speed for the day last more than a few moments) are at their highest at the end of December where the average sustained speed reaches 22 nerves, which is regarded as a strong briz. The graph below shows the average humidity per month at Pico Island. The graph key below shows wind speed (max and medium) in the nose. Clear average wind speeds is it safe to travel to Pico Island? Our best data indicate this area is generally safe. As of October 07, 2019 there are no travel advisors or warnings for Portugal; normal safety safeguards exercise. Check this page for any recent changes or regions to avoid: Travel advice and advisor. This advice was last updated on 22 May 2019. The bus and the least busy month-long festival for tourists in Pico Island, Portugal is January, followed by late February and October. Prices for hotels and flights will be more expensive during these months, though you can save if you buy goods in advance. Tourists seem to be visiting Pico Island in November. Those who want to visit in these times will likely find it the least expensive month. Tourism estimates by Most Popular Tourist Key visitors seeking accommodating tourism graph-based Google search for services used by tourists relative to the rest of the year. Tourism data for this extraordinary area is based on nearby areas. Data shows they calculate relative to the peft, so a score of November 50.4 means 50.4% of the tourists vs January. Overall Island Experiments travel by Spring (March through May) humidity and temperature combined to make this season feel moderate. High varies between 68.9°F (20.5°C) and 62.1°F (16.7°C) and warmer temperatures in the later months. Rain is somewhat common and 6 to 10 days of significant rainfall per month. Spring is slower for tourists, which makes it a good time for people looking for deals. Summer (June through August) months are very comfortably bad weather and high temperatures are comfortable. These months see rainfall at least and 4 to 6 days of monthly rainfall. June - August is the second bus season for tourists at Pico Island, so housing and other accommodations can cost a little more. Fall (September to November) Fall daily high varies between 77.5°F (25.3°C) and 63.7°F (17.6°C), which will feel very nice given the moisture and wind. It rains or snows a significant amount: 7 days 11 per month. Tourism is fairly slow during these months due to the bad weather, so hotels can lower priced. Cool season (December until February) Weather is somewhat cool this time of year at Pico Island to be glorious for hot travellers. The average high during this season is between 64.2°F (17.9°C) and 61.9°F (16.6°C). On average, it rains or snows a large quantity: 10 to 13 times per month. These times in years are the bus and tourists.
